

**CONTENT
NOTE**

This example discusses a workplace emergency.

CONTEXT

Conditions have changed quickly. You have incomplete information, and the team needs direction.

THE PLAN / WHAT THE SYSTEM EXPECTED

The duty lead pauses activity when conditions become unsafe.

WHAT DO YOU DO?

DECISION 1

Choose the next operational step.

- A** Pause all activity.
- B** Continue while gathering more information.
- C** Choose another response.

COMMIT BEFORE YOU CONTINUE. Mark your choice, then turn the page.

WHAT THE RECORD SHOWS

The activity paused.

DOCUMENTED	The team paused activity and reassessed conditions.
RECOLLECTED	Several participants remember the pause as gradual rather than immediate.
TEACHING LESSON	AUTHORITY Plans work best when they identify who can pause activity and how that authority is communicated. Where does that authority sit in your system?
